Summary

With experience as a candidate for a software engineering certificate, I am a passionate software developer that is eager to solve problems using coding and creative thinking skills. Experienced in writing and reviewing code, as well as collaboratively solving problems within a team. I am driven, adaptable, and understand fundamental computer science concepts as well as an understanding and practical use of various technologies. Prioritized maintainable and well-tested code.

Education

2022

PER SCHOLAS

Software Engineer Certificate

Experience in building dynamic and responsive web-based applications that showcase technical understanding of MERN tech stack, as well as computer science fundamentals.

Skills

- JavaScript
- Node
- Python
- Express
- React
- MongoDB
- HTML
- CSS
- Git/ Github

Projects

August 2022

[Github Repo](#) | [Project Link](#)

BACKEND APP FOR SMALL STORE

The purpose of this project was to create 7 restful routes using the MERN tech stack. In this app any user can add, edit, and delete an item into the index. The updated item will show on the index page. Heroku was used for the deployment of this project.

July 2022

WIZARD TRIVIA GAME

A dynamic trivia game that not only tests user's knowledge of Harry Potter, but aides in learning fun trivia facts. This game was built using JavaScript, HTML, and CSS. My plans are to implement more questions and develop a counter to keep the user's score which can be returned to them when they decide to stop playing. Deployed using Github pages.

Relevant Experience

2022

Per Scholas | Full-time Student

CANDIDATE FOR SOFTWARE ENGINEER CERTIFICATE

In this accelerated bootcamp program I am learning computer science fundamentals such as algorithms, data structures etc., as well as the MERN (MongoDB, Express, React, Node) tech stack. Per Scholas also has their students participate in professional development as well as various tech seminars. The most recent being Capital One's interactive webinar.
